Plan3 Feature Map

This page maps the plan3 streams to the current repository surface. It is a navigation aid for users and maintainers: start here when you know the feature area but not the module, example, or doc page.

Stream	Feature	Main modules	Examples	Docs
1	Pool + health	<code>gemstone_py.session_providers</code> , <code>gemstone_py.aio.pool</code>	<code>examples/</code> <code>fastapi/</code> , <code>examples/</code> <code>litterstar/</code>	<code>docs/user-manual.md</code> <code>docs/cookbook.md</code>
2	Streaming results	<code>gemstone_py.gsquery</code> , <code>gemstone_py.aio.gsquery</code>	<code>examples/</code> <code>async_features/</code>	<code>docs/examples-guide.md</code> , <code>docs/</code> <code>performance.md</code>
3	Typed codegen	<code>gemstone_py.codegen</code>	<code>examples/</code> <code>typed_access/</code> <code>codegen_demo/</code>	<code>docs/codegen.md</code>
4	Observability	<code>gemstone_py.observability</code>	web examples with provider snapshots and metrics	<code>docs/</code> <code>observability.md</code>
5	Migrations	<code>gemstone_py.migrations</code>	<code>examples/</code> <code>persistence/</code> <code>migrations/</code>	<code>docs/cookbook.md</code> , <code>docs/user-manual.md</code>
6	Inspect/ debug	<code>gemstone_py.inspection</code> , <code>GemStoneSession.inspect</code> , <code>dump</code> , <code>describe_class</code>	<code>examples/</code> <code>cookbook/</code>	<code>docs/user-manual.md</code>
7	Framework adapters	<code>gemstone_py.web_core</code> , <code>gemstone_py.frameworks</code> , <code>gemstone_py.aio.fastapi</code> , <code>gemstone_py.aio.litterstar</code>	<code>examples/</code> <code>fastapi/</code> , <code>examples/</code> <code>litterstar/</code> , <code>examples/</code> <code>django/</code>	<code>docs/framework-adapters.md</code>
8	Examples	<code>gemstone_py.cli</code>	<code>examples/</code> <code>quickstart.py</code> , <code>examples/</code>	<code>examples/README.md</code> , <code>docs/examples-guide.md</code>

Stream	Feature	Main modules	Examples	Docs
			webstack/, examples/ cookbook/	
9	Performance docs	gemstone_py.benchmarks , gemstone_py.benchmark_compare	examples/ native_backend/	docs/performance.md
10	Native wheels	gemstone_py.native , gemstone- py-native/	examples/ native_backend/	README.md , RELEASE_CHECKLIST.md
11	Bootstrap	gemstone_py.bootstrap , gemstone_py/_gemstone_side/	examples/ quickstart.py , examples/ cookbook/	docs/setup-guide.md

Commands

From an installed package:

```
gemstone-examples plan3-map
```

From a source checkout:

```
python -m examples.cookbook.plan3_feature_map
python -m gemstone_py.cli plan3-map
```

Notes

The historical example paths are intentionally stable. `examples/cookbook/` acts as a table of contents rather than a mass move of existing modules, so old links, tests, and user imports continue to work.

This PDF was generated locally from the Markdown sources in `docs/`. If you edit the source files, rerun `python docs/build_pdf_docs.py`.
