Plan3 Feature Map

This page maps the plan3 streams to the current repository surface. It is a navigation aid for users and maintainers: start here when you know the feature area but not the module, example, or doc page.

Stream	Feature	Main modules	Examples	Doc
1	Pool + health	<code>gemstone_py.session_providers</code> , <code>gemstone_py.aio.pool</code>	<code>examples/fastapi/</code> , <code>examples/litestar/</code>	<code>docs/</code> <code>docs/</code>
2	Streaming results	<code>gemstone_py.gsquery</code> , <code>gemstone_py.aio.gsquery</code>	<code>examples/</code> <code>async_features/</code>	<code>docs/</code> <code>gui/</code> <code>per/</code>
3	Typed codegen	<code>gemstone_py.codegen</code>	<code>examples/</code> <code>typed_access/</code> <code>codegen_demo/</code>	<code>docs/</code>
4	Observability	<code>gemstone_py.observability</code>	web examples with provider snapshots and metrics	<code>docs/</code> <code>obs/</code>
5	Migrations	<code>gemstone_py.migrations</code>	<code>examples/</code> <code>persistence/</code> <code>migrations/</code>	<code>docs/</code> <code>docs/</code>
6	Inspect/ debug	<code>gemstone_py.inspection</code> , <code>GemStoneSession.inspect</code> , <code>dump</code> , <code>describe_class</code>	<code>examples/cookbook/</code>	<code>docs/</code>
7	Framework adapters	<code>gemstone_py.web_core</code> , <code>gemstone_py.frameworks</code> , <code>gemstone_py.aio.fastapi</code> , <code>gemstone_py.aio.litestar</code>	<code>examples/fastapi/</code> , <code>examples/</code> <code>litestar/</code> , <code>examples/django/</code>	<code>docs/</code> <code>ada/</code>
8	Examples	<code>gemstone_py.cli</code>	<code>examples/</code> <code>quickstart.py</code> , <code>examples/</code> <code>webstack/</code> , <code>examples/cookbook/</code>	<code>exa/</code> <code>docs/</code> <code>gui/</code>
9	Performance docs	<code>gemstone_py.benchmarks</code> , <code>gemstone_py.benchmark_compare</code>	<code>examples/</code> <code>native_backend/</code>	<code>docs/</code>

Stream	Feature	Main modules	Examples	Doc
10	Native wheels	<code>gemstone_py.native</code> , <code>gemstone-py-native/</code>	<code>examples/native_backend/</code>	REA REL
11	Bootstrap	<code>gemstone_py.bootstrap</code> , <code>gemstone_py/_gemstone_side/</code>	<code>examples/quickstart.py</code> , <code>examples/cookbook/</code>	doc
12	Bulk operations	<code>GemStoneSession.bulk_perform_*</code> , <code>PersistentRoot.get_many</code> , <code>GsDict.update_many</code> , <code>OrderedCollection.extend</code>	<code>examples/example.py</code> , <code>cookbook</code> snippets	doc doc doc
13	Retry and diagnostics	<code>gemstone_py.transactions</code> , <code>gemstone_py.concurrency</code>	conflict examples and tests	doc doc doc obs
14	Explicit value conversion	<code>gemstone_py.converters</code>	<code>examples/cookbook/value_converters.py</code>	doc doc
15	Schema fingerprinting	<code>gemstone_py.migrations.schema_fingerprint</code> , <code>gemstone-migrations fingerprint</code>	migration examples	doc doc

Commands

From an installed package:

```
gemstone-examples plan3-map
gemstone-examples value-converters
```

From a source checkout:

```
python -m examples.cookbook.plan3_feature_map
python -m gemstone_py.cli plan3-map
```

Notes

The historical example paths are intentionally stable. `examples/cookbook/` acts as a table of contents rather than a mass move of existing modules, so old links, tests, and user imports continue to work.

This PDF was generated locally from the Markdown sources in `docs/`. If you edit the source files, rerun `python docs/build_pdf_docs.py`.
